SUMMARY

Second-year Computer Science and Data Science student with hands-on experience in web app development, data analysis, visualization using Python and modern libraries and ai-driven solutions. Seeking a challenging internship to contribute to real-world projects and further develop my technical and problem-solving skills.

TECHNICAL SKILLS

- **Programming:** Python, Java, C
- **Web:** HTML, Node.js, Django
- **Data:** Pandas, Matplotlib, Seaborn, Tableau, Jupyter notebook
- **Tools & Concepts:** Data Visualization, Problem Solving, Time Management, Quick Analysis

ACCOMPLISHMENTS AND PROJECTS

- National Level Hackathon Participant

Collaborated with a 4-member team to develop a prototype addressing a real-world problem. Qualified the internal round among multiple participating teams.

- Data Analysis Web App

Built a Python-based web application using Pandas, Matplotlib, and Seaborn. Enabled users to upload CSV files and generate visualizations to analyze datasets effectively.

- QR Code Generator Web App

Developed a web app using Python and Flask to scan and generate QR codes. Integrated `qrcode` and `pyzbar` libraries for encoding and decoding functionality.

- Menstrual cycle prediction and PCOS/PCOD risk assesment

Building a ml-driven menstrual tracker using various models like xgboost.

EDUCATION

Bachelor of Technology - Computer science engineering and Data science (2023- Present)

Mahatma Gandhi Institute of Technology

CGPA: 8.6
